

CAPTIVE Project

SENIOR EXPERT NOTE n° 3

Purpose of this note :

Cross-national findings on experiences of sexual and gender-based violence among migrant women in 6 European countries

Very interesting and quality report and PPT presentation.

The PTT presentation used visual restitution : very important !

This form can be developed for the public restitutions. It is important to integrate visual support for the public accessibility of this essential subject. Everybody must have access to the results and be impacted.

Both of work present a very fine analyse of the situation in the 6 European countries. The emergency situation of the women and the insufficient supplies are highlighted, with a qualitative presentation.

The use of interviews extracts to extend the analysis is very fine, and give a result for all the publics : professionals, politics, users, ...

The different problems are evocated.

It would be interesting to join one more part with professional supports and experience Germany did a very interesting work, which is not presented in this rapport. All countries have supports, from ministry, or association. They constitute a very important element for the next part of the project. A review of this support is absolutely necessary in the objective of the project.
