

## **CAPTIVE Project**

### **SENIOR EXPERT NOTE**

Purpose of this note : Second video

#### **Vidéo**

This video is now really interesting as a support of discussion. The rythm is well adapted. and it stopped at the good moment.

I would propose 2 more little details :

- the reference JUST/2015.... Isn't it possible to introduce it at the end of the movie? It would also give the possibility to inform again of the European project with the stars one the blue background.
- the information « this video has been produced.... stays for a very long time in the image. At one moment, there is a black : I would stop the information at this black moment and start the story.
